(Continued from First Page)

were awakened by the dog and heard the roar of rushing water crashing over the dam. The roar appeared to be a first wave of terrific strength and then a second of much greater volume. Smith declared none stopped to dress, but ran for their lives. They lost all the buildings and possessions on the ranch.

Robert E. Atmore, 45, another fifteen miles up the canyon from the dam, was questioned particularly by Coroner Nance concerning any noise he heard before the dam broke. Atmore said he heard none and knew of no one thereabouts who had. Atmore testified he saw the dam about two days before the break and "thought it looked dangerous."

H. A. Van Norman, assistant chief engineer of the water bureau, was on the witness stand for several hours. He was questioned in detail concerning the construction of the barrier.

"In my opinion the location of the dam there was justifiable," Van Norman testified.

### RESCUE OPINION

"Do you feel that the site was bedrock?" Coroner Nance asked.

"That is a matter of judgment," the witness replied. "The cause of the failure is unknown and I'm reserving an expression of opinion until the various expert investigations have given us the benefit of their findings."

"Do you believe it was built in a secure manner?" the Coroner asked.

"I do. I believe it was," he replied.

He testified that "Mr. Mulholland was always on the job," and the general understanding during construction was that everything was being satisfactorily built. Testimony also indicated that at the time of the break the dam was at the same level as the river before the night of the break Van Norman said:

"Everything as far as I could see was as secure as it had ever been. There was no water at both sides of the dam and some at the bottom. The water was perfectly clear and there was no indication of erosion."

"There was never any communication to our office that I know

about that indicated the dam was in any danger."

"I would not have had any apprehension about staying all night below the dam, as I have done many times. If we had had any apprehension that the dam would have been 'soaking' we would have been the first to have alarmed the countryside. Neither would have jeopardized anyone."

Van Norman testified that had he had any warning of the impending break it would have been impossible to have let out the water in such quantities as would have presented the flood. Residents below the dam, he said, have had no water and their lives were at the bottom. The water was perfectly clear and there was no indication of erosion.

"There was never any communication to our office that I know

about that indicated the dam was in any danger."

"I would not have had any apprehension about staying all night below the dam, as I have done many times. If we had had any apprehension that the dam would have been 'soaking' we would have been the first to have alarmed the countryside. Neither would have jeopardized anyone."

Van Norman testified that had he had any warning of the impending break it would have been impossible to have let out the water in such quantities as would have presented the flood. Residents below the dam, he said, have had no water and their lives were at the bottom. The water was perfectly clear and there was no indication of erosion.

"There was never any communication to our office that I know

about that indicated the dam was in any danger."

"I would not have had any apprehension about staying all night below the dam, as I have done many times. If we had had any apprehension that the dam would have been 'soaking' we would have been the first to have alarmed the countryside. Neither would have jeopardized anyone."

Van Norman said: "It is still there and anyone can examine it and see that it is all right."

"Do you know anything about the construction of this dam that might be a clue to its failure?" the Coroner asked.

"No, I do not," the witness replied.

"It was a type of dam built and condemned safe in many places."

"The concrete speaks for itself," Van Norman said. "It is still there and anyone can examine it and see that it is all right."

"Do you know anything about the construction of this dam that might be a clue to its failure?" the Coroner asked.

"No, I do not," the witness replied.

"It was a type of dam built and condemned safe in many places."

"The concrete speaks for itself," Van Norman said. "It is still there and anyone can examine it and see that it is all right."

**SINCLAIR FIGHT FOR DELAY LOST****Magnate Must Stand Separate Trial Without Fall****April 4 Set for Next Teapot Oil-Fraud Hearing****Ex-Secretary's Case Goes Over Indefinitely****(Continued from First Page)** might be drained by nearby developments.**STORY OF RANCH DEAL**

In 1922 Sinclair visited the Three Rivers ranch and became interested in the property and after a conference with M. T. Everhart, Fall's son-in-law, it was decided to sell an interest in the oil man.

On April 15 Sinclair sold \$23,500 for one-third interest in the properties which the affidavit says, Fall will contend was worth more than he received for it.

Fall assured Sinclair at a recent conference that in the south west that he is ready to tell the whole story of the lease of the Wyoming naval reserve, which was followed by a payment of \$233,000 in Liberty Bonds to him by the wealthy oil operator. The former Interior Secretary reiterated that desire yesterday in newspaper interviews.

However, he flatly refused to subject himself to interrogation by the Senate Teapot Dome committee, which is investigating oil yesterday if he would do so and the committee abandoned for the present, at least, its plans to send its chairman, Gerald P. Nye, of North Dakota, and its prosecutor, Thomas J. Walsh of Montana, to El Paso to take his testimony.

Explaining his position, Fall said he is ready to have his deposition taken for in a court of law as his testimony then would be held within the legal bounds, whereas if he were questioned by a Senate committee there would be no limitation upon the scope of the questioning.

**FALL EXTREMELY FEELING**

Counsel J. Roberts, of special government oil counsel, and Senator Walsh said the deposition of Fall could not be used at the trial under constitutional limitation unless the defense asks that it be taken.

Special oil counsel probably would not object to the deposition unless they made it plain that they are not seeking Fall's testimony. They maintain that the case is made complete with the testimony of his son-in-law, M. T. Everhart, of Pueblo, Colo., that Sinclair paid out a total of \$233,000 in Liberty Bonds after the lease of Teapot Dome, ostensibly for one-third interest in the Fall ranch properties, but without receiving from anyone any evidence of such holdings in the property.

With Fall in extremely feeble health many believe that he never will be brought to trial. He has faced the courts twice as a result of the naval oil leases; once with Fall as defendant in California, with whom he was acquitted, and the other time with Sinclair. A mistrial after the result in that case after it was discovered that Sinclair was having the jurors shadowed.

**VIGOROUS FIGHT MADE**

Indefinite postponement of the trial of Fall was obtained by his counsel, William E. Leahy of Washington, and his special government counsel. Reports received from government physicians agreed with those attending Fall that his condition is such that his life would be endangered if he were required to come to Washington on April 2, the date set for the trial.

Roberts and former Senator Pomerene then moved that the cause be severed and that Sinclair be placed on trial April 2. Taking the position that Fall is a material witness in the defense, George F. Hoover, counsel for the oil operator, opposed this motion vigorously, but Justice Bailey granted the government's motion.

Then defense counsel sought a two-months' postponement on the dual ground that Fall was material witness and that the withdrawal of Fall's counsel deprived them of necessary aid and that they will be unable to prepare the case for trial within a month. Hoover also presented an affidavit signed by himself declaring that he and Martin W. Ladd, of New York, Sinclair's chief counsel, will be busy on April 2 in other trials already under way.

**SURPRISE SPRUNG**

Opposing a postponement, government counsel called attention that early in January notices were given that a severance of the cases would be asked if Fall could not come for trial and argued that the defense must be allowed to have so much time in which to prepare their case in advance of April 2.

Roberts sprung a surprise by reading a letter from Mark Thompson of Los Angeles, Fall's counsel to the unidentified, in which he said if there is any contention presented to the court that Fall would be able to appear for trial before late in the summer, it should be controverted strenuously. The letter had the endorsement of Fall himself, as shown by his "O.K." in the margin.

Government counsel emphasized that the previous failure to complete the trial was due to actions of Sinclair himself, since he had hired the detectives to shadow the government's jury. They also argued that the government already has summoned its large numbers of witnesses from all parts of the country and some from Canada and

**BORAH NOW SHY ONLY \$156,000****Sinclair Repudiation Fund Increased Yesterday to Total of \$4000****WASHINGTON, March 22. (AP)—** Contributions to the Sinclair repudiation fund were increased \$600 today.

Senator Borah of Idaho has collected about \$4000 in cash in answer to his appeal to Republicans to wipe out the \$160,000 contribution by Harry F. Sinclair to the Republican State committee, who refused to answer certain questions put to him by the Reed campaign fund committee in 1920.

In reporting Cunningham's resolution the Senate today Senator Kimball, Democrat, Utah, introduced

resolution for Cunningham's arrest and will ask tomorrow for its immediate consideration.

Cunningham, who is clerk of a court in Philadelphia, and one of the most prominent Republicans in the Senate, is in the lead in the fight for the Mahoney Aircraft Company. William S. Vare, in his fight for a Senate seat, refused twice to tell the Reed committee the source of \$50,000 cash which he contributed to Vare's primary campaign in 1920. The cash, which is \$8000 a year and members of the committee express curiosity as to how he could have accumulated such a sum by savings and be able to give it to a political campaign committee. Cunningham held that the source of the money was his own private business.

Accompanying the report on Cunningham was another from Senator King dealing with the cases of Samuel M. H. Kimball, Chicago utilities official, and his son, Kimball, Jr., and Samuel Schuyler, who, after withholding certain information from the committee, changed their minds and later freely answered all questions.

**JOCKEY CLUB TRACKS OPEN TO SINCLAIR HORSES****NEW YORK, March 22. (AP)—**The Jockey Club, controlling power on the turf in New York, today refused to support the action of the Maryland Racing Commission in barring Harry F. Sinclair because of his association with the oil scandal.

The Maryland commission, which has barred Sinclair and his establishment, the Rancocas stable, from all four Maryland tracks, made no move to bar him from the tracks followed here, but its action nevertheless was put formally before the stewards of the Jockey Club for consideration.

The stewards, to make their position clear, rejected a resolution specifying that "the ruling of the Maryland Racing Commission in no way affects the entries of the Rancocas stable on race courses under jurisdiction of the Jockey Club."

Stewards' rules also are to be followed in all the fixtures for the meetings at the four metropolitan tracks, Aqueduct, Jamaica, Belmont and Empire City, as well as at Saratoga, which also is controlled by the Jockey Club.

**MELLON FORCES WIN IN SENATE****(Continued from First Page)** long enough to protest that the Cousins move was a continuation of a "personal feud" with the Secretary. This went unanswered by Cousins, who has fought the Treasury on tax matters during much of Mr. Mellon's seven years' administration.

"I protest that the Senator is bringing to the floor of the Senate a personal feud between himself and Mr. Mellon, which has gone on for years," Moses said. "Since he has seen fit to portray a recital of vicious, malicious statements which are untrue in some instances, I protest further that the more orderly procedure would have been for him to ask for impeachment in the manner prescribed by the Constitution."

Before the close of the Senate's second remaining hour at 2 p.m. forced an end to this discussion in favor of unfinished business, Senator Reed moved to refer the resolution to the Finance Committee and announced he was ready for an immediate vote. Senator Norris then moved that the Senate accept unanimous consent finally that the resolution go over until tomorrow without prejudice, but that proposal and another effort to go ahead with it today met with objection, and Senator Odell of Minnesota, who had previously offered it at the time, sent the resolution to the calendar of business.

**STRICT PARTY ROW**

The debate was all on the Republican side of the Chamber. Senator Cousins cited a long list of complaints, including one that Mr. Mellon had failed to reveal knowledge of the contribution of Harry F. Sinclair, the Repudiation Fund committee, and another charging that he is holding office illegally because of a statute forbidding appointment of a Secretary of the Treasury who is directly or indirectly interested in trade or commerce.

Replies, Senator Reed told for the first time the story of how it was learned that Albert B. Fall, then Secretary of the Interior, had some Liberty bond traces.

He said if there is any contention presented to the court that Fall would be able to appear for trial before late in the summer, it should be controverted strenuously. The letter had the endorsement of Fall himself, as shown by his "O.K." in the margin.

Government counsel emphasized that the previous failure to complete the trial was due to actions of Sinclair himself, since he had hired the detectives to shadow the government's jury. They also argued that the government already has summoned its large numbers of witnesses from all parts of the country and some from Canada and

**SECOND SENATE ARREST SOUGHT****Warrant for Vare Supporter to be Demanded****WASHINGTON, March 22. (AP)—** Contributions to the Sinclair repudiation fund were increased \$600 today.

Senator Borah of Idaho has collected about \$4000 in cash in answer to his appeal to Republicans to wipe out the \$160,000 contribution by Harry F. Sinclair to the Republican State committee, who refused to answer certain questions put to him by the Reed campaign fund committee in 1920.

**LINDBERGH TO HAVE LUXURIOUS NEW PLANE****NEW YORK, March 22. (AP)—**A**MANY FLY WITH LINDBERGH****Hundred Congressmen Soar Skies With Air Hero as Thousands Swarm Over Field Seeking Ride****WASHINGTON, March 22. (AP)—**Col. Charles A. Lindbergh today stayed on the ground just about long enough to jump from one plane to another, spending the rest of the time showing the sights of Washington to more than a hundred Congressmen, members of their families and government officials.

The Army's Fokker and the Navy's Ford ship, both triple-motored cabin models, together made nearly a score of trips with Lindbergh at the controls, carrying the legislators over the Capitol, Arlington Cemetery and the Washington Monument.

Several thousand persons swarmed over the field, seeking by fair means or foul to be included in the list headed by Assistant Secretary of Commerce MacCormick.

The carnival spirit of the crowd was enhanced by the arrival of five bombing planes from Langley Field, Va., and maneuvers of the flyers.

The planes were off without a hitch, except that at one time Lindbergh's plane stuck in the mud while taking off. The passengers, among whom were Representatives Taber of New York and Shallenberger of Nebraska, had to get out by a hatch and walk to the plane.

The plane will have accommodations for three passengers, with a top speed of 125 miles an hour. The interior finish will be the last word in airplane luxury. The seats will be deep-cushioned leather chairs and the instrument board will be of mahogany.

The nickel-plated motor is probably the most beautiful that has ever been built. It is a Wright Whirlwind of 220 horsepower and is the gift of its builders. Other parts of the plane are also gifts from their builders to Lindbergh.

**MANSLAUGHTER VERDICT****MERCED, March 22. (AP)—**Anthony Bassett, charged with the murder of Mary Hernandez, was found guilty of manslaughter in Superior Court last night. Sentence will be passed Monday.**LINDBERGH TO HAVE LUXURIOUS NEW PLANE****NEW YORK, March 22. (AP)—**A**TAX RECEIPTS AGAIN CLIMB****Income Several Millions Above Last Year's****WASHINGTON, March 22. (AP)—**Another jump in the rate of receipts from the 15th inst. income-tax collections was noted today in Treasury figures.

To the close of the business the 20th inst. the payments had reached \$365,004,468, while for the same period last year the total was \$358,504,668.

Secretary Mellon holds the opinion that estimates of the Treasury on the amount of government surplus will not need a revision, since some increases in Congressional appropriations are likely to offset the extra return from the income tax.

Through the Treasury on the 20th inst. the payments had reached \$365,004,468, while for the same period last year the total was \$358,504,668.

# SHIPPING NEWS

AND ACTIVITIES AT  
LOS ANGELES HARBOR

## HARBOR RENTAL RATES AWAITED

Entry of Several New Lines  
Reported Pending

Action Held to Depend Upon  
Rate Schedules

Hearing on Matter Put Over  
by Port Commission

Three and possibly five new steamship lines are contemplating entry into Los Angeles Harbor, but all are holding out to see what the Harbor Commission's proposed new rental charges and other revenue-raising measures are going to be, it was learned yesterday from what herefore has been a trustworthy source.

One of the lines operates out of the Mediterranean, one from France and another from Northern Europe, while definite knowledge as to the others was unavailable to the writer.

The new rates about which the lines appear concerned relate to the proposed half-cent-a-square-foot rental to be charged steamship companies on all cargo, 1½ cent per ton hauling charge to be assessed all trucks hauling from docks, and 1 cent per ton assessed stevedoring companies on all cargo handled.

The rates were to have come before the Port Commission Wednesday, but a quorum was lacking. It is understood the steamship lines not only look with misgivings on any such rigorous means of raising revenue, but that civic organizations likewise see in the move a reduction in the margin guaranteed wholesalers to compete in cuttling fields.

One steamship man, asking not to be named lest retaliation be taken out on him, said the port is too young and needs too much to encourage lines for a few years yet, to discourage them by imposing unreasonably charges.

"They invited us in here; got us here and now are going to soak us. Hongkong seemingly didn't have a chance in the world to become a port, but they made things attractive. Hongkong now is the second port in the world of commerce," he said.

"Merchants and the public are not now in the mood to pay more for their goods, and it's a cinch we can't absorb them although harbor officials insist we must not pass them on."

## LOCAL YARDS GIVEN SHIP CONVERSION JOB

Los Angeles Shipbuilding and Drydock Corporation captured the \$60,000 job of rebuilding the steamer Lake Miraflores into an oil carrier, as low bidder in San Francisco yesterday. The vessel will arrive here in tow of a Nelson steamer Sunday and construction will start at once. New bulkheads will be built in and the ship is to be completed in thirty-five days.

On completion she will be chartered for three years by the Western Oil and Refining Company to carry petroleum products from its West Basin plant to San Francisco and possibly other coast ports. Stanley Hiller, one of her principal owners, will continue operating her. She will carry about 11,000 barrels of fuel oil and 16,000 gallons, exclusive of her bunkers.

Standard Fruit and Steamship Company had tabled its plans for a steamer service to Latin America from Mexico and instead is shipping them mainly by rail, due to lower rates, according to Rosario DiGiorgio, vice-president of the American Fruit and Steamship Company. Rates have been cut both from plantations at Ato, Mexico to El Paso, and from El Paso here, he said, to such a point as to make it inadvisable to ship from Ato to Salina Cruz by rail and rehandle her in Mexico City. However, the company yesterday received 12,000 stems from its plantation at Cristobal on the Latin-American motor liner Benjamin Franklin.

Master of a flagship at 28 years of age, is the record of Capt. Jens Feragen of Norway, who brought in the Latin-American liner motor liner Benjamin Franklin from Northern Europe yesterday. The ship is the newest in the line and is on her third round voyage in this service, with passengers and freight. Capt. Feragen went to sea first in 1915. He was a master at 26, since which he has commanded the majority of ships of his line. He will venture into another kind of a sea when his ship returns to Norway, when he will lead to the altar Miss Sigrid Toemmeraas, daughter of one of the older captains in the line.

A. P. Ziff, vice-president and coast manager at San Francisco for the Williams intercoastal line, arrived yesterday for a conference with J. C. Haagen, San Francisco agent. The Williscos, named for Ziff, are in for bumpy weather bound for the East Coast full of lumber and general cargo, while the Williscos are due today with 1800 tons from the East Coast. The line recently acquired its eleven ships, the Williscos, Seaboard, which will permit a westbound sailing every nine days instead of ten as at present.

## AIR MAIL SCHEDULE

Now in effect: Universal postage rate of 10 cents per half ounce anywhere in the United States or to and from Canada, postage sent by air mail.

The transcontinental air mail service to and from Southern California is now in operation. The service is to and from Los Angeles and San Francisco in both directions daily, with flights to and from San Diego at 7:35 a.m. Pacific Time and arriving at Hatley Field (New Haven) at 10:30 a.m. Eastern Standard Time the second day. The office can be reached later.

Westbound departure from Hatley Field is at 12:30 p.m. Eastern Standard Time with arrival at Los Angeles at 2:25 p.m. Pacific Time.

The Los Angeles daily closing for airmail is 6:20 a.m. Eastern Standard Time, or 4:25 a.m. or a little later at the airmail letter boxes. Letters and packages, however, are located in various parts of the city. Items for the airmail are restricted to a maximum of 100 pounds in weight and not to more than 10 inches in length and 6 inches in width and 2 inches in height combined.

**PACIFIC COAST ROUTE**

Operations are made at all air mail points on the coast of California and at the Aerodrome Station post office not later than 10:30 p.m.

The transcontinental airmail is on the following schedule: Northbound, San Francisco, 8 a.m. Arrive at Bakersfield, 1:45 p.m.; Fresno, 3:20 p.m.; San Francisco, 4:30 p.m.; Los Angeles, 6:20 p.m.; San Diego, 7:35 a.m. (Arrive at Hatley Field, 10:30 a.m. Pacific Time) and return.

The Los Angeles daily closing for airmail is 6:20 a.m. Eastern Standard Time, or 4:25 a.m. or a little later at the airmail letter boxes. Letters and packages, however, are located in various parts of the city. Items for the airmail are restricted to a maximum of 100 pounds in weight and not to more than 10 inches in length and 6 inches in width and 2 inches in height combined.

**ADMISSION FEES**

Harvard, San Diego, 2 p.m.—150

**Lady Mary's Flight Balked**

LONDON, March 22. (P)—The Daily Mail today prints a dispatch from Cairo saying that Lady Mary Bailey has been balked in her attempt to make a solo flight from England to Capetown, South Africa, as a summer holiday.

Unless she is accompanied, she will not be allowed to go beyond Cairo, an official of the British Aeroplane Club in Egypt told her. Authorities in the Sudan are understood to have disapproved the flight because they consider that the dangers which would follow a forced landing make it hazardous for a woman to make the flight alone.

Lady Mary, however, is not able to take a passenger because the extra seat in her plane is occupied by gasoline cans.

**CONVICT JOKES ON EVE OF DOOM**

*McDonald Hanging Likely Early This Morning*

VALLEY FIELD (Cal.) March 22. (P)—George McDonald joked with jailers in his cell today while in the prison yard the rock-coated hangman tested the crimson gallows on which McDonald is to die in the morning for murder.

McDonald said here that the man who had told him he had not been told that the death sentence imposed on his young wife and been commuted to life imprisonment.

McDonald's wife was convicted in December of the murder of Adelard Douchard, a Lachine taxi driver, last July.

**WALES SUGGESTS CYCLE RACE WITH OCTOGENARIAN OFFICIAL**

WINDSOR (Eng.) March 22. (P)—The possibility of the people of Windsor witnessing a bicycle race between the Prince of Wales and Sir William Corbett, Windsor's octogenarian Mayor, caused some temporary excitement today. Interest was aroused on the publication of an extract from a speech made by the Prince at a dinner here, in which Sir William, who stands 6 feet 7 inches high when he is 85 years of age, and still takes that kind of exercise almost daily, recounted an interchange he had with the Prince when Wales last visited the city.

The Prince at that time remarked that it was "marvelous" that Sir William, who is 85, still takes exercise by means of which his monthly electric-lighting bill was reduced from \$25 a month to \$7. Where can we get an enclosure, he said it will draw and we shall get some money for one of your local charities."

Sir William replied that he was willing, but stipulated a downhill course.

The excitement died down, however, when inquiries among responsible Windsorites developed that the Prince's suggestion for a race was regarded merely as general banter.

**CLUB MANAGER MUST PAY**

TUCSON (Ariz.) March 22. (Exclusive)—Otto Williams, manager of a negro club, is to pay the local utility company \$100 while under a one-day suspension sentence.

He was found to have met his wife by-pass by means of which his monthly electric-lighting bill was reduced from \$25 a month to \$7.

LEVINE POSTPONES FLIGHT

CURTIS FIELD (N. Y.) March 22. (P)—Adverse weather today caused Charles A. Levine to postpone a contemplated endurance flight with his monoplane Columbine.

**COUNTESS WINS ALIENATION SUIT**

*Jury Finds Her Unaware of Convict Mate's Wife*

BRUSSELS, March 22. (P)—A projected air trip by the Belgian royal family to Copenhagen on April 16 has been abandoned by a decision of the Belgian government because of public anxiety over its potential danger.

The Danish court, which King Albert and his family will visit, also objected. Instead the Belgian family will travel by rail, the way of Germany, but incognito, thus avoiding official German comments which might distress public feeling in Belgium.

**Belgian Royalty Voids Air Trip**

**EUROPE FIGHTS AMERICAN AUTO**

*Move Reported on Foot to Curb Imported Cars*

PARIS, March 22. (P)—The Paris Herald today said a huge European automobile cartel is being organized to keep American makers out of continental markets.

Italians are the prime movers in the project. They will broach it at a meeting of the leading automobile manufacturers of the world to be held in Paris in May.

They will propose putting American cars on a quota basis in the European market and will ask American manufacturers, who will be represented at the meeting, to agree voluntarily to the proposal.

*John Wright* "—still slashing  
and smiling!  
and taking my bows from a lot of Happy Men"

My bitter pill was Ace-deuce news to hundreds of men. If you don't think this slashing prices on expensive suit material is not the pay-off for Easter dressing up to men who are trying to save something—just come up and get a load of what's happening... All primed for Easter, along came the rain and left me loaded with woolens meant for \$50 and \$60 suits... I decided to slash prices and grin... my first reduction of this kind since this great establishment opened its doors.

"John Wright's upstairs shop has never yet been called 'Failure Island,' rain or no rain," said I. "Come and get 'em, boys, and have a right happy Easter sprucing up! 2-Pants Suits at \$34—worth up to \$50. And values up to \$60—at \$44. Come and get a couple!"

Did they come? Well, John's place has been so busy we've raced around like Easter Rabbits getting their eggs colored for the big event.

It's a big run show for your money. A grand and glorious feeling! We had to write our own ticket on these \$50 and \$60 Spring woolens or bury our own dead. And if there isn't any profit in it we surely are going to get a pile of fine advertising out of it—a man can't go about town telling friends WHERE HE GOT IT, without doing John Wright a load of good... I doubt if you can get ONE-pants suits at near \$34 and \$44 to come within several dollars of equaling my TWO-PANTS EASTER SPECIALS. Certainly not the style and elegance of individualized Tailoring.

Spring woolens—those new stripes and plaids and colors. All the latest models recognized as FASHION by New York and London tailors. Youthful and modern ideas—or any conservative model you prefer. America's greatest 2-Pants Tailored Suit Store takes on all comers, and satisfies.

**P.S.** Remember—JOHN WRIGHT GUARANTEES SATISFACTION. He never lets a suit leave that isn't fully gratifying—in every respect. Tailoring and fit. Only the finest pure woolens. Only the cream of designers, cutters, and finish tailors. Everything GUARANTEED. All orders will be filled at these prices while the \$50 and \$60 qualities last.

OPEN DAILY TILL 6 P. M.—SATURDAYS TILL 10 P. M.

## STEEL COMPANY TO SLICE MELON

Southern California Concern Declares Special

Stock Dividend of 10 Per Cent Voted by Directors

Secretary Reports Sales for 1927 at \$4,000,000

Reflecting the condition of basic industries in Los Angeles, directors of the Southern California Iron and Steel Company declared yesterday a capital stock dividend of 10 per cent, according to an announcement following a special meeting of the board of directors. The company is controlled by the Pacific Coast Steel Company.

Dividends were suspended by the company in 1921 and were last year inaugurated at the rate of 8 per cent per annum. Previous to 1921 the rate was 8 per cent and in 1918 a special cash dividend of 5 per cent and a stock dividend of 50 per cent was declared.

Throughout the coming year the company expects to spend approximately \$500,000 for construction of improvements, should the condition of the industry remain normal, according to W. P. Kelley, secretary. Since reorganized and acquired by the Pacific Coast Steel Company in 1925, the business has expanded rapidly, and in 1927 reached a gross business of nearly \$4,000,000, which was more than 30 per cent greater than in 1926, he said.

The first two months of this year have been far ahead of the corresponding months of last year, according to Mr. Kelley, based on March figures, though good, appear to be falling below March of 1927. The increase in the importation of steel products is assigned as the chief reason for the decline.

The company, which employs more than 600 workers, operates a modern steel rolling mill plant, bolt and nut works on a tract of about twenty-five acres on East 8th Street. Approximately 80 per cent of the products are sent to Los Angeles and Southern California. Markets in Arizona are gradually being developed.

## SOUTHWESTERN GAS EARNINGS INCREASE

Southwestern Gas and Electric Company for year 1927 reports gross operating revenue of \$1,058,980, compared with \$1,036,646 in 1926. Amount available to preferred stock after bond interest, amortization, etc., was \$1,150,506 in 1927, compared with \$1,026,629 in 1926. The company's territory was considerably broadened during the year with the addition of forty-five communities in East Texas and twelve in Arkansas, resulting in an 88 per cent increase in electric customers. The company now serves eighty-nine communities, including Shreveport, Texarkana and the surrounding areas.

## NEW POLICY FOR RICHFIELD

Payment of Dividends Partly in Stock New Practice in Corporation Finance; Advantages Listed

BY EARL E. CROWE

Richfield Oil Company, in adopting a policy of paying quarterly dividends partly in stock, is following a comparatively new trend in corporation finance. Very few companies have gone in for regular stock dividends as a substitute for cash dividends, either wholly or in part, but where the policy has been tried the sponsors are well satisfied over the results.

North American Company, one of the largest public holding companies, is the only large corporation paying dividends wholly in stock. Several other corporations, like Richfield, are following the fifty-fifty plan of part cash and part stock, and Barnsdall Corporation, the Mid-Continent Oil Company, is now paying quarterly dividends entirely in stock.

Probably more companies would find the policy of Richfield for the stock dividend were more widely understood by stockholders. For the company, the chief reason for following this plan is the conservation of cash for the purpose of financing the expansion line in the building of equity, or the increase of the investment interest in a growing company.

### POLICY EXPLAINED

Frank L. Dame, president of the North American Company, in his statement of the advantages of his company's stock dividend policy, said: "The stock dividend is the short cut to increased value of investment holdings, without impacting upon the stockholder additional financial outlay. It is the complete protection and automatic accumulation of capital or cash available if he wants it."

Richfield, as does North American, has provided for the purchase of stock by stockholders, holding the stockholder to either add to his holdings, or realize in cash. If the stock dividends are retained, the stockholder, as Mr. Dame explained in his statement, retains his proportionate interest in the company and also the opportunity for potential profit. This advantage is obtained without additional financial outlay, which is contrasted with the subscription right policy, in use by many corporations, under which the exercise of rights entails the expenditure of more money.

Of subscription rights, Mr. Dame says:

### COMPARISSON MADE

"The advantages of stock dividends derived by both stockholder and company are best explained by comparing it with one of the oldest of corporation practices, that of giving rights to stockholders from time to time to subscribe usually at par for additional stock. As a matter of fact the regular payment of stock dividends equivalent in effect to combining cash dividends with subscription rights, except that the former gives stockholders more frequent and convenient subscription privilege."

"In other words, public utility companies that pay dividends in cash and issue subscription rights periodically, Mr. Dame, in comparing this policy with that of the North American Company, says:

"In either of these cases the additional stock purchased at par would have a market value today of more than 75 per cent above its cost. The stockholder, to maintain his proportionate interest in the company, will be called upon to exercise all subscription rights offered him and to reinvest not only his cash dividends but an additional amount in cash. The North American stockholder, by retaining the stock which he receives in the form of dividends, maintains his proportionate interest in the company without additional investment, and of course his new stock represents an increase in return in accordance with its increased market value today."

FOREMAN TRAINING COURSE ANNOUNCED

UNIVERSITY COLLEGE CLASS SCHEDULED TO START MONDAY EVENING

Practical courses in industrial management for the training of foremen and those preparing for the position of foreman will be offered at the University of Southern California at the downtown branch, university college, beginning Monday evening, March 26, next. The course will continue until June.

Special lecturers in charge of Charles Hansen will direct the various phases of industrial management. Among those scheduled to speak are Earle V. Grover, Baker Iron Works; Roy Wood, Standard Oil Company; K. B. Lowell, Wurster Construction Company; F. T. Haas, Standard Oil Company; and E. B. Pearson, Southern California Edison Company; E. A. Nicholson, Pacific Scale and Door Company; L. E. Seymour, Peerless Laundry Company; W. K. Ralston, Los Angeles Gas and Electric Company; C. T. Coughran, Cudahy Packing Company; C. A. Stiles, Lucy Manufacturing Company; and R. M. MacLennan of the Los Angeles First National Bank.

MCCULLOUGH ELECTED OIL COMPANY HEAD

W. B. McCullough was re-elected president of the Midway Northern Oil Company at the annual organization meeting of the board of directors yesterday. R. S. Field was elected vice-president to succeed Charles A. Cole and C. E. Sissel was elected secretary-treasurer to succeed M. M. Miles. The following directors were elected by the stockholders at the annual meeting held in Phoenix Tuesday, last: W. B. McCullough, R. S. Field, C. E. Sissel, W. M. McGiffert, John K. Burkett, Emil Kirchner and Charles A. Cole.

### UTILTY INCOME GAINS

NEW YORK, March 22. (9p)—Net income of Associated Gas and Electric for the year ended Jan. 31 soared to \$6,172,742 after charges and preferred dividends of subsidiaries, from \$3,998,565 the year before.

## ESPEE RAIL NET INCOME INCREASES

February Earnings Gain Nearly 40 Per Cent Over Same Month in 1927

Net railway operating income of the Southern Pacific Company for the month of February, last, increased \$638,766.62, to a total of \$3,074,105.63, or nearly 38 per cent over railway operating income for February, 1927, of \$2,235,338.63, it was revealed in the statement issued by the company.

Net railway operating income for the first two months of the year amounted to \$4,984,984.92, as compared with \$4,420,673.19 for the corresponding period of 1927, a gain of \$664,311.73, or more than 15 per cent.

Net revenue from railway operations before tax accruals and joint liability rents, aggregated \$5,125,868.45 for the month of February, last, up against \$4,993,758.64 in February, 1927, or an increase of \$199,971.97, or nearly 40 per cent.

At the same time, the revealed statement of Bank of Italy and Bancitally shareholders will be allowed to acquire stock of the Bank of America, recently merged with the California organization. It will be up to the bank of one share of Bank of America for twenty-four of Bank of Italy, or Bancitally, or both.

Gianinni, in a formal statement, said:

"We want to set at rest once and for all the rumors that have been circulated with respect to the possibility of our giving the stockholders either extra, special or stock dividends or an increase in the regular dividend rate."

"The board of directors of the Bancitally Corporation, after a long meeting to decide this matter in whatever manner I felt would be to the best interests of the Bancitally Corporation.

"In fairness to the present stockholders and to the general public, as well as to future investors, and making this announcement at once, so that those who are contemplating the purchase of our stock may guide themselves accordingly."

"We can say definitely at this time that the decision we have reached will be shown to the public through the regular channels of the stock exchange. It will be up to the stockholders to decide whether to buy our stock on the basis of its present quarterly return of 56 cents a share should do so without expectation of receiving anything additional."

Truce Reached in Fight Over Spreckels Plan

CHICAGO, March 22. (9p)—Net earnings from all sources were listed as \$14,419,162.83, while the surplus earnings, after dividends and appropriations, were \$5,432,301.54. Two dividends were paid, one November 15, by Pullman, Inc., \$1.41, and another November 16, \$1.42. The other dividend was paid by the Pullman Company, the carrier organization, August 15, for 2 per cent and totaled \$2,699,794.

There was a falling off in gross earnings from all sources with the corresponding month of the previous year, as shown in the report. The amount of the decrease was about 2 per cent. This, however, was offset by a reduction of expenses.

The Spreckels group originally engaged in the plan to merge with the Marvin group, in control, the recapitalization and upon their approval the plan was submitted to the stockholders.

The Marvin group has urged that S. D. Leidner & Co. or New York be retained to analyze the plan and upon the acceptance of the latter proposal that the truce was effected today.

STANDARD MORTGAGE IN ANNUAL MEETING

F. B. CHAPIN AND W. H. ALLEN NAMED TO VACANCIES ON DIRECTORATE

F. B. Chapin, local capitalist, and W. H. Allen, vice-president of the Title Insurance and Trust Company, were elected directors of the Standard Mortgage Corporation for the purpose of approving a recapitalization plan to the 27th inst.

According to the group opposing the recapitalization plan their relatives have been compelled with the time being to make a choice between the Spreckels faction, in control, and the Marvin faction, which was gathered 33,000 votes to oppose the recapitalization.

The Spreckels group originally engaged in the plan to merge with the Marvin group, in control, the recapitalization and upon their approval the plan was submitted to the stockholders.

Other officers re-elected include Herbert M. Haskell, vice-president; John H. Coverley, vice-president and secretary, and A. R. Walker, treasurer.

Directors in addition to the new members are Frank E. Eckhart, Harry Lee Martin and Leo G. MacLaughlin.

### APPROVAL OF UTILITY ABSORPTION SOUGHT

NEW YORK, March 22. (9p)—Net income of Associated Gas and Electric for the year ended Jan. 31 soared to \$6,172,742 after charges and preferred dividends of subsidiaries, from \$3,998,565 the year before.

THE GLOBE

## MONEY PRECEDENT UPSET

Drop in Call Rate on Wednesday Reverses Usual Trend and Surprises Wall Street

BY PAUL WILLARD GARRETT

(Copyright 1928, by New York Evening Post, Inc.) NEW YORK, March 22.—Yesterday's drop in the call rate to 4% per cent took Wall Street by surprise, for precedent decrees that funds tighten in the week following tax payments and after a prolonged upswing in prices.

Whether the unexpected drop in money represents a flush condition not especially significant or something more, it frankly puzzles the best money authorities and encourages bulls in the market to hope for a continuation at least of comfortable money. On two occasions in the last week the market has increased a temporary fall in money on the 15th inst. None came. It anticipated a firming up in rates this week. Instead, the prevailing rate fell. We may assume that the February call rate, which was 4% through the month, will remain at 4% through the month, though its

successor will be 4% through the month, though its

## NEW YORK CURB STOCKS

NEW YORK, March 22. (AP)—Trading was both broad and active on the curb market today. Scores of issues reached new highs, but many of those previously leading in the advance ended the day with losses as great as 14 points. In industrials and public utilities were heavily bought with no particular group in either especially favored. Only late in the day did an unusual amount of support swing to a few oils and pipe lines, comparatively small in view of the record turnover of the big board, falling more than 500 points below the curb's recent record of 1,267,700.

Deere & Co. was outstanding among industrials, with a net advance of nearly 10 points to a new high of 1,250. Celanese advanced about 6 and Lehman and Navigation about 4. Bancitaly recovered from its recent slump, moving up nearly 2 points. Most of the large gains lifted industrials to new highs, among them Brillo, U. S. L. Battery, United Machinery, Franklin Mfg. and Standard Chemical. Some of the recently strong motor shares were forced down by profit taking. Post of Canada dropped 14 and Auburn 13. Cunker Hill and Sullivan, Insurance Company of North America, New Mont Mines and Tube Art Silk slumped 2 to 3 points. Public Utilities turned reactionary, with Electric Bond and Share and Electric Lighters dropped about a point after early gains. Puget Sound lost 5 and United Gas Improvement, Blackstone Valley, Utility Power and Light and Empire Power registered losses. American Liner and Traction, Northern Ohio Power, Southern Gas and Utilities A and Central Public Service A resisted, while advancing to new high ground. Gulf Oil, Solar Refining sagged 3 points each. Standard of Kansas touched a new high at 183-5, and some Standards registered small gains.

The closing price is quoted when same as the day before, both low and close when the day is high.

FEDERAL JURY  
INDICTS SCOREWoman Accused of Raising  
\$30 Check to \$30,000"Lothario of Air" Charged  
With Posing as OfficerSan Pedro Postoffice Janitor  
Held Mail Thief

Indictments against twenty-one persons were returned yesterday by the Federal grand jury in Federal Judge Jacobs' court. One indictment against three persons was held secret.

Among those indicted is Mrs. Lillian D. Richardson, who was accused of altering a government compensation check for \$30 to read \$30,000. She has been held under bail fixed by United States Commissioner Edward E. Gandy at \$3000.

George Ross, alias George Ross and George Roast, was indicted on a charge of impersonating a government air-mail officer. His bail is fixed at \$3000.

It is charged that he obtained \$300 from a letter carrier by posing as "Lothario of the air" and telling her he had to have money because he had lost an air-mail bag and would be fined.

Isaac N. Buggs, a negro janitor,

## LEGAL MAZE GRIPS LAWYER

Appears to Face One Charge of Contempt and Finds  
Himself in Trouble Over Clients' Property

When Moses C. Davis, Los Angeles attorney, appeared before Superior Judge Craig yesterday afternoon to show cause why he should not be cited for contempt of court, he was cited on another charge of a like offense and ordered to return to court on the 27th inst. at 9:30 a.m. to answer the accusation.

The continuance was granted at the request of Paul Schenck, attorney for Davis, who told the court that he had just been retained by the defendant and required additional time to familiarize himself with the charges.

The new charges against Davis are set forth in three affidavits sworn to by Paul T. Case, Mrs. Cornelia Case, his mother, and Superior Judge Collier. According to the affidavits, Case was facing sentence for violation of probation and Davis was his attorney. Under promise that he would get Case a "federal" out of California (an attorney's last name is an attorney's forty-four hours) in lieu of an impending sentence to San Quentin, Davis persuaded Mrs. Case to sign over her property at 3108 Hobart Boulevard, valued at \$12,000, according to the affidavits.

Both Case and his mother, in their affidavits, assert that Davis said he would have the case brought working at the San Pedro post office, was indicted for opening mail. His bail is fixed at \$3000. Other

Indictments are for violations of the Dyer Act, the Tariff Act and the Mann Act.

GEN. HINES  
TO INSPECT  
FORT HEREGarrison Review Will be  
Followed by Six Weeks of  
Artillery Practice

Maj.-Gen. John L. Hines, commanding the Ninth Corps Area, will make a two-day inspection of the coast defenses of Los Angeles at Fort MacArthur, on the 29th and 30th inst., beginning six weeks of intensive activity for the Third United States Coast Artillery.

Gen. Hines, arriving from San Francisco at 2:30 p.m. the 29th inst., will review the garrison immediately, inspect the lower reservation, visit the fort, and have a conference with the commandant, Lieut.-Col. Willis G. Peace, and his staff.

On the second day, Gen. Hines will view the operation, under war conditions, of the Fort MacArthur Artillery, including the gun center, to be followed by execution of a tactical problem and inspection of the post's upper reservation. He will inspect also the One Hundred and Sixtieth Infantry, National Guard unit, while here. He will leave for San Diego at 2 p.m. the 30th inst.

During the four weeks from April 9 to May 3, Fort MacArthur will be maintained in a "war period," with Battery "A" and Battery "B" in turn encamped on the upper reservation, under actual service conditions.

Annual target practice with the 155-millimeter guns will be fired by Battery "B" on April 12, while on April 19 that battery will fire record practice with a famous disappearing battery. Battery "A" will fire the twelve-inch mortars of Batteries Sexton and John Barlow April 26 and May 3, while on May 10 and 11 the same battery will fire two practice with the 155-millimeter battery.

The objective in all exercises will be a triangular target, towed at sea by an army tug.

TIRE PLANT  
WORK AHEAD  
OF PROGRAMConstruction of Firestone  
Factory to be Completed  
in Few Months

Construction work on the new Pacific Coast plant of the Firestone Tire and Rubber Company at South Gate is well ahead of the original building schedule and it will be ready for operation early in the summer, according to C. A. Myers, director of engineering, in charge.

"All the structural steel has been erected in the departments throughout the factory," he declared yesterday. "This includes the four-story warehouse, processing and tire-preparation sections. We now have more than nine acres of space covered with structures, and the roofs are being put on."

The plant, which is expected to arrive at the factory this week, include motor parts for the powerhouse, a water purification plant and hydraulic accumulators which maintain pressures for the processing department operations.

Lost-Love Fear  
Leads Woman  
to Death Try

Fearful that she was about to lose the love of her sweetheart, a city fireman, according to San Quentin State Hospital authorities, a 32-year-old woman, Earl E. Moss, refused to be taken to a hospital yesterday before Earl E. Moss, refusing in bankruptcy, to account for many asserted expenditures made shortly before her bankruptcy plea.

Mrs. D'Arcy cites two diamond rings valued at \$2000 as her only assets and her liabilities at \$22,000.

Tradesmen and others in answers to questions by Attorney I. R. Rubin, representing E. A. Lynch, trustee of the estate, told of Mrs. D'Arcy's asserted excessive expenses. One witness testified that she paid \$25 for one bottle of perfume.

Although Mrs. D'Arcy was present in court, she did not reach the witness stand. Her former husband, however, was called in an effort by the trustee to find some other assets of Mrs. D'Arcy to add to the small bankrupt collection.

The actor, nonchalant and indifferent to the proceedings, related his own dimness in getting along in life on \$500 a week.

He cannot make both ends meet on his salary, he said. The fact of the matter is, he cannot even maintain a car on that salary, he said.

So let his automobile go back to the finance company.

Mrs. D'Arcy was ordered to appear again next Tuesday, when she will be called to the stand.

Glendale Avenue, several miles from her home.

The little girl was taken into a nearby home and was cared for before being taken to the police station, where she told Chief Fraser of Glendale and members of the detective bureau that she had slept out all night under a tree. Nothing could be learned from her that would indicate any kidnapping attempt had been made, nor was she harmed in any way.

After the alarm was spread when the child failed to return from the Boronia school, a squad of police searched the city and surrounding foothills in a vain hunt for her, stopping automobiles to question their occupants. The description of the child was broadcast over the radio and hundreds of volunteers enlisted in the search. Early yesterday Mayor MacBain authorized Councilman Hatz, chairman of the Police Commission, to detail every available man for the quest.

BEAUTY OF CITY  
HALL PRAISED

(Continued from First Page) caused here by this group of private citizens, when carried out, will result in one of the most valuable accomplishments ever undertaken for the city's advertising. It is also apparent that funds will be needed and that this money must come from sources outside of the city treasury. However, as chairman of the Finance Committee of the Council, I promise to urge the Council to financially aid this worthy project."

Chairman Schenck announced appointment of additional officers of the general committee, including Mrs. William Read, William M. Garland, John Steven McGroarty, John T. Newell, Judge Leonard Wilson and A. W. Hoch as vice-chairmen; Joseph Bartori, treasurer; E. Merle, assistant treasurer; E. J. Delaney, assistant to the chairman, and Fred Frank, secretary.

## THE LANCER

(Continued from First Page) bitterness or injustice on either side. Modern engineering has almost accomplished miracles; but it is not infallible. The consequences of this one failure are a matter to be adjusted between good neighbors.

## HUNGARIAN LINEN

The corps at the nation's capital have had plenty of other trouble, and now they have had to settle a Hungarian civil war on the White House sidewalk. The pickets who have been picketing in defiance of that rolled-up country should be deported. If they are still more interested in Hungarian politics than in being good Americans, they had better go back and fight it out on their own dung pile.

AIRPORT ACTION  
SET FOR TODAY

(Continued from First Page) but recommends the purchase of the San Fernando Valley instead of the Seaside field, recommended by the majority members, the maximum price of the Van Nuys land to be \$10,000. The total purchase price of all other land under the Hall plan is estimated at \$4,500,000.

DESPONDENT WORKER  
ENDS LIFE WITH SHOT

Despondent because he had been out of work since early in January, George H. Newberry, 31-year-old motorman of 1014 Park View street, shot himself in the head at his home yesterday and died an hour later in the Georgia-street Receiving Hospital, police report. He leaves his widow, Mrs. Catherine Newberry, and a 6-year-old stepdaughter. The body is at the County Morgue.

of the Editorial Department to the error.

No employee of The Times is permitted to  
accept any gratuity, in money or its equivalent,  
from any individual, group or organization  
having news or business relations with the  
Times. The public should clearly understand  
that it is not necessary for any person, organization  
or anybody to do or say anything to The Times  
and that any Times employee who accepts  
"gifts" calculated to influence his or her work  
for the newspaper is thereby rendered liable  
to immediate discharge.

Bad laws, if they exist, should be repealed  
as soon as possible; still, while they continue  
in force, for the sake of example they should  
be religiously observed.

—Abraham Lincoln.

A SEVERE PENALTY  
Headline in New York newspaper:  
"Dollar-a-Pound Penalty on Unmuzzled  
Dog Owners." This would be rather a  
stiff fine for a dog owner who weighed  
250 pounds.

S OUR GOODE  
California rhubarb is being re-  
cycled in large quantities in New York  
and other eastern cities, and is being  
consumed by the carload. This will not  
tend to sweeten the imagination of east-  
erners with respect to California, but it  
means sweet times for our rhubarb  
growers.

INCURABLE  
"I do more work than any other  
man in New York," said Mayor Walker  
while on his way to Palm Beach recently.  
Yes, some people find traveling very  
hard work, but most of us enjoy it and  
never think of placing it in the category  
of labor. The Mayor's wit would  
seem to be incurable.

A MAIDEN REPORT  
Representative Evans of Glendale  
delivered his maiden speech in Congress  
in advocacy of the administration's  
naval bill. The Congressman is a member  
of the Committee on Naval Affairs  
and is in accord with Secretary Wilbur.  
He, therefore, realizes the importance  
of a modern navy to the Pacific Coast—  
even in the spreading of the gospel of  
peace.

THE OLDEST DIVORCE  
After a couple of years of married  
life a Denver woman who wedded at  
the reckless age of 94 years is asking  
the court for a divorce. Usually there  
is another man in the offing, but this  
matron of 96 summers admits that she  
has nobody else in mind at this time.  
She has merely discovered that mar-  
riage is not what it is cracked up to be  
and she craves her freedom. There are  
no limitations in the divorce courts.

TAXING THE TRUCKS  
The Supervisors in this State are  
virtually unanimous in favor of the  
Wag bill, which would place an added  
tax upon commercial trucks—based  
upon their weight and their loads. The  
huge trucks with their burdens of stone  
and steel are said to be mainly responsible  
for the early wrecking of the State  
highways. Increasing the tax upon this  
form of traffic is about the same as  
making the bad boys pay for the windows  
they have broken.

NO FIXED PURPOSE  
The Anti-Saloon League in speaking  
for the members of that organization  
asserts that it will not give assent or  
encouragement to any Presidential  
candidate who is not morally, mentally  
and physically dry. A mere agree-  
ment to enforce the law to the best of  
his ability will not count. He must be  
eager to do it. The League has one  
fixed purpose and that is the enforcement  
of the prohibition amendment. Candidates  
will govern themselves accordingly.

A TWISTED PHRASE  
Prime Minister Stanley Baldwin of  
England gave a new twist to a famous  
Welshman's phrase. He said: "We must  
make democracy safe for the world." Just  
what the Premier meant by this has  
been given many interpretations by  
London newspapers. Perhaps a little  
light is shed by the sentence which fol-  
lowed his odd statement: "If in Great  
Britain our work for democracy should  
fail, our failure would shake the very  
fabric of the universe." One wonders  
how much that failure would shake  
Petaluma, Cal., or South Bend, Ind.  
Perhaps they would continue to main-  
tain their positions on the planet.

A NOTHER QUIXOTE  
Resident Commissioner Isidro Gabaldon of  
the Philippines, having resigned from his position at Washington,  
is on his way home for the express purpose  
of fighting "tooth and nail" the  
policy of Gov.-Gen. Stimson. Senator Gabaldon,  
the richest native of the islands, says he is going to start a newspaper  
that will not only keep alive independence  
sentiment, but fan it up as never before.  
The Philippines are a part of a  
free country, and Senator Gabaldon has  
an unquestionable right to start a newspaper  
or a dozen of them, to advocate  
independence, free gas, bobbed hair,  
callisthenics, or what have you. He will  
get about as far in his proposed campaign  
as other agitators have done.

## GOOD FAITH OF THE SOVIETS

With twenty-two nations against it  
and only three, Russia, Germany and  
Turkey, in its favor, the impractical pro-  
posal of the soviet government for im-  
mediate universal disarmament failed at  
Geneva, leaving the way clear for a  
more moderate but realizable plan. The  
speech of Ambassador Gibson, the Amer-  
ican delegate, on Wednesday sealed the  
fate of the soviet plan. He explained  
clearly that the United States, seeking to  
outlaw war by means of multilateral  
treaties, will not bind itself to a pro-  
posal, rejection of which by any one nation  
would mean rejection by all, pre-  
ferred a plan which can be put into ef-  
fect by the acceptance of a few nations  
and can gradually be extended.

Ambassador Gibson did not challenge,  
as did most of the other speakers, the  
good faith of the soviets. The challenge  
was unnecessary; that phase of the dis-  
cussion was thoroughly covered by the  
speech of the British delegate, Lord  
Cushenden, on Tuesday, and by Baron  
Bolin-Jacquemyns of Belgium. The latter's  
argument was most succinct: "An  
olive branch is brandished over our  
heads in such a way as to resemble a  
cudgel," he said. "Hated of our civilization  
is behind this project."

Lord Cushenden also scored a telling  
point when he invited the Russians to  
take away the rifles, machine guns and  
grenades with which their military pol-  
ice keep in subjection the Russian pop-  
ulation, and adopt instead the simple  
truncheon of the British hobby.

"We are justified in asking," said Lord  
Cushenden, "whether the soviet wants to  
put an end to civil wars as well as inter-  
national wars. We are justified in doubting  
it, because they solemnly announce  
their intention of mounting rebellion in  
every country where they can exercise  
influence."

The good faith of Russia was not be-  
side the point; it had to be considered  
and examined in connection with every  
detail of the soviet proposal. It is not  
only the announced purpose of the  
soviets to foment rebellion everywhere  
that brings that good faith into question;  
it is the soviet record for breaking  
promises at every turn, for concoction of  
schemes that would make Machiavelli  
glad twice, once for their brazenness  
and once for their coldness.

The soviet government is the first on  
record to attempt to conduct conspiracies  
in a spotlight, to shout its secret  
purposes aloud and then wonder how  
they became exposed. As a send-off for  
the soviet delegation to Geneva, for example,  
it was announced in an official  
soviet paper that the delegates would  
"snatch the mask from the face of cap-  
italist countries." Thanks to Lord Cush-  
enden, the situation has been reversed  
and it is the Bolsheviks who stand re-  
vealed as having an ulterior and sin-  
ister purpose.

"We are engaged in this study of how  
to effect limitations and reductions of  
armament by agreement," said Ambas-  
sador Gibson, in continuing his argu-  
ment. "We are now asked to scrap this  
work, which is the result of several  
years' negotiations, and accept in its  
place total immediate disarmament,  
which has frequently been considered in  
the past and invariably rejected as un-  
workable."

Because the United States is sincere,  
logical and consistent, he said, it finds  
itself unable to support proposals which  
are not calculated to achieve their ends.  
True progress moves one step at a  
time; it is wise enough not to leap in the  
dark.

## WHY TELL HIM?

When charges against Dep. Dist-  
Atty. MacKay came before the Civil  
Service Commission Wednesday, his  
counsel, Attorney A. D. Orme, urging  
haste, said MacKay had been the sub-  
ject of "vicious attacks in the press"  
which had impaired his efficiency and  
morale and the morale of the entire Dis-  
trict Attorney's office, and added:

"Dist.-Atty. Keyes wants to know is  
there anything wrong with his office and  
if so he won't stand for it."

If Mr. Keyes does not already know  
what is wrong with his office, or a part  
of it, his attention must be unusually  
hard to attract.

The public will be glad to hear that  
if he ever does find out what his dep-  
uties are doing, "he won't stand for it."

If Mr. Keyes does not already know  
what is wrong with his office, or a part  
of it, his attention must be unusually  
hard to attract.

## TRICYCLE TOO SLOW FOR HIM So Boy Decides to Take Ride in Auto

Dewey Barnes on His Tricycle

Tired of furnishing his own  
motive power and bored with  
the slow speed of his tricycle,  
6-year-old Dewey Barnes, 2101  
South Hill street, yesterday decided  
to change to an automobile. See-  
ing a car parked near his home,  
he dumped his discarded tricycle  
in the rear, climbed into the driver's  
seat and started the motor.

At the car got under way, he  
over W. 11th street, 1828. When  
Eighty-ninth street, happened to  
see it and gave chase. Dewey was  
unable to shift into high gear and  
Lauden soon caught up. He called  
police and the boy was taken to  
the Georgia-street station, where

his father, Fred Barnes, obtained  
his release after promising to see  
that his son refrained from such  
actions in the future.

### DAMAGE ACTION WON BY WOMAN'S ESTATE

The estate of Sally Lytton How-  
ard won a judgment against Fanny  
Briggs Carr, Inc., for \$1000 by the  
verdict of a jury in Judge E. G. Schaefer's  
court at 11th and Spring. The action  
was for damages for the death of Mrs.  
Howard, who is asserted to have died  
from lead poisoning as the result  
of using a face lotion prepared by  
the defendant corporation.

Los Angeles Chamber  
Approves Proposal to

Chamber of Commerce, following re-  
port on a survey made by the  
chamber's committee on real es-  
tate, parks and city and county  
planning.

This bond issue comes before the  
voters in the fall election and pro-  
vides in part for a survey of possible  
sites for State parks to be selected  
by Franklin D. Roosevelt.

The \$6,000,000 is to be matched by  
an equal amount raised by private  
donation, grants, local bond issues  
and the like before any State  
money would be available.

The movement in favor of the  
State park bond has been  
with widespread attention, accord-  
ing to Harold James, chairman of the  
committee, who reports more  
than 200 representatives at a recent  
meeting of the State Park Com-  
mission.

SELF-DENIAL  
FUNDS AGAIN  
TO BE RAISED

Salvation Army to Pray  
and Economize Rigidly  
During Holy Week

The Salvation Army will observe  
self-denial week, April 1 to 8. This  
pre-Easter period is marked annually  
by the Salvation Army throughout  
the world as a special period  
for prayer and self-denial, and for  
raising funds among its own per-  
sonal and the friends of the organiza-  
tion to maintain army workers in  
heathen lands.

During this week before Easter  
every officer and soldier of the  
Salvation Army rigidly denies himself  
of the necessities of life, using the  
money thus gained for the support of  
less favored comrades in dark  
countries.

The self-denial fund, inaugurated as  
an army institution forty-two  
years ago, has enabled the Salvation  
Army to maintain and extend its  
service into a world-wide organiza-  
tion established in eighty-five  
countries and colonies, speaking  
fifty-nine languages, with 718,000  
members, operating under the  
direction of 22,947 active officers and  
cadets.

Commissioner Adam Gifford of  
western territorial headquarters in  
San Francisco, asked the active  
division of the army for this ter-  
ritory, which covers in area the  
eleven Pacific Coast States and Hawaii,  
to observe self-denial week with fitting  
programs at every meet-  
ing place.

He also spoke of the relative  
density of the stars. A sphere three  
inches in diameter, composed of a  
substance of the average density of  
earth, he declared, would weigh  
two and one-half pounds.

The same sphere composed of water  
would weigh one-half pound, of  
solar matter, three-quarters of a  
pound, of iron ten pounds and of  
the "white dwarf" companion of  
Sirius, fourteen tons. He rated the  
density of the stars as being the  
stars of such incredible density as  
one of the most important scientific  
discoveries of the times.

## PAINTER SEIZED AS BANK ROBBER

Suspect Traced from East to Lancaster

Handwriting Proves Clew for Detectives

Accused of Taking Part in \$20,000 Theft

Traced from Liberty Heights, Md., by detectives, Harry L. Schroeder, formerly an employee of the Liberty Bank of that city, was arrested while painting a house on a desert ranch nine miles east of Lancaster and charged with the kidnapping of the bank in which \$20,000 was taken January 10, last. Capt. C. E. Peoples of the Sheriff's robbery investigation department revealed yesterday.

Schroeder's presence in Los Angeles County was made known when Executive Lieutenant Charles J. Kohler and Cornelius Roche of Liberty Heights, Md., arrived in this city, stating that they had traced mail in a handwriting similar to Schroeder's to the Lancaster post office.

At Lancaster, the officers found that Schroeder was using the name of Harry Edwards, and was employed by a painting contractor.

After Schroeder's arrest, according to the officers, John Washburn, a member of the Liberty Bank, was taken into custody and confined his part in the crime implicating Schroeder and another man named Tony Marino. The latter two each received \$8000 of the loot while he received \$2000. Washburn is asserted to have told officers.

LATVIAN PLAY PLANNED

A drama depicting country life in Latvia will be given by members of the Latvian Friendship Club Sunday evening in the auditorium at 7819 South Flower street. The program will start at 6 o'clock.

MISS LOGAN DECLARED

The occasion for this six-episode drama is an argument. Judge Schaefer wanted to know what could have started an argument that ended so violently.

"Well, he called me a dumbbell," Miss Logan said.

"And I said, 'You're a resentful old dog!'" Judge Schaefer suggested.

"Naturally," Miss Logan agreed.

"And I called a doctor, too; and it left a great big black-and-blue bruise on me."

But the great big black-and-blue bruise is plenty of time to vanish from the place where it had been before it brought Miss Logan to the divorce court, according to her testimony. The quarrel took place just a short time after the wedding of Miss Logan and Mr. and Mrs. Gillesepe, only last December 15, she said.

She was granted a divorce, no one being present to oppose her plea.

STATION LIST GIVEN

There are now outstanding some twenty construction permits for stations not yet licensed to use the power which is to be installed and which might be affected by any new policy announced by the commission with respect to power.

These include some California stations: KWBK, Burbank, from 250 to 500 watts; KFON, Long Beach, 500 to 1000 watts; KFWR, Hollywood, 1000 to 1000 watts, and KNX, Hollywood, 500 watts.

Other western sets include KYDL, Salt Lake City, 100 to 500 watts; KFKY, Flagstaff, Ariz., 50 to 100 watts; KGEK, Yuma, Ariz., 500 to 1000 watts; KOHA, Pueblo, Colo., 500 watts; KJL, Durango, Colo., 500 watts; KJL, Salt Lake City, 1000 to 5000 watts.

LEGION PROGRAM

A broadcast by the American Legion of Jesus will be a feature

on KFJZ, the Don Lee stations, for a half-hour commencing at 2:30 this afternoon.

On the 4 o'clock educational hour the musical part of the program will be furnished by students from the Los Angeles High School department of music including the school orchestra; a piano solo by Sylvia Panitz; Eva Williams with a soprano number; Marjorie Niccol, contralto, and Phillip Pearson, tenor, of the student body, with a four-part student chorus.

On the 5 o'clock schedule Douglass Steel, tenor, a newcomer to the KFJZ talent, will serve as soloist.

COMPOSER HONORED

The evening features will include Salvador Baguer, baritone, as soloist with the Flamingo instrumental sextet at 7 o'clock.

Paul R. Kepner, musical director, will lead studio concert orchestra at 8 p.m. in a program featuring compositions of Albert W. Ketley.

Although this musician has composed many numbers, undoubtedly the one best known, is "In a Monsoon." Gardeners will find this well known, but equally as fine, in his "Jungle Drums." "In the Moonlight," "An Oriental Song," "In a Persian Market," "In a Camp of the Ancient Britons" and "Wedgewood Blues."

"Echoes of the Rialto," a Friday station feature, will be on the air the following hour with the studio mixed quartet in an offering of selections from musical comedies as selected by the Rialtonas concert orchestra.

NAVY CO-OPERATES IN RADIO EXHIBITS

SEVILLE (Spain) (Via Mail) (Exclusive)—The Navy Department of the United States will send a radio exhibit to the International exposition to be held here from April 1928, to June, 1929. It will be housed in the United States building on the exposition grounds under the direction of Thomas E. Campbell, American Commissioner-General.

The exhibit will include sound material illustrating the Navy's part in developing communication via radio, the sonic depth finder and underwater sound transmission apparatus.

RADIO PROGRAM FOR NURSES' BENEFIT

Onesie Jones, 14-year-old "cellist, will be heard on KFJZ, Hollywood, on the 4 to 5 o'clock hour this afternoon when the Los Angeles College of Music and Art broadcasts a program for the benefit of the nurses' campaign to aid in raising the mortgage on their local clinic.

The young artist is a pupil of Herbert L. Riley and Constance Kullen, who have arranged the radio hour.

Commissioners Warn Owners of Possible Action

Four California Sets Listed in Dispatch

KHJ Plans Varied Hours on Broadcast

BY RALPH L. POWELL

Broadcasters who have construction permits for increased power, for the use of which licenses have not yet been issued, have been cautioned by the Radio Commission against incurring any large expenses until radio legislation now pending in Congress has been disposed of.

It is pointed out that the commission may find it advisable to refuse increases in power in many localities as a result of the agitation for equitable allocation of broadcast transmitting facilities among the stations.

Regardless of Congressional action on the Davis reallocation amendment to the radio bill, it is likely that the commission will undertake to straighten out the situation in the country without adequate radio facilities because of the superabundance of power and stations licensed in other sections.

## PRODUCERS REUNITED

ASHER, SMALL AND ROGERS ANNOUNCE PLANS

BY GRACE KINGSLEY

From Palm Springs yesterday, where the trio are now sojourning, came rumblings of news involving the re-formation as a producing company, Asher, Small and Rogers, which company has been dissolved during the past year.

Small and Rogers, however, are shortly to resume business under the name established some time ago.

Edward Small, who has acted as producing inspiration for the company, which, however, will not interfere with his own individual imprint, the Fannie Bruce-Vita-Phone production of "My Man" and a comedy to be directed by William Beaudine.

According to word just received, Asher, Small and Rogers are to make six big-scale specials, to be produced under production guidance of Small, and the first production will be Bayard Veiller's "The Pillaged Face," which is planned will be released concurrently with the stage showing of the piece in New York City.

The company will not produce exclusively First National, while Charles R. Rogers is making another of his Ken Maynard series.

Popular Players With McCoy

There is nothing now to stop Tim McCoy from going right ahead and making "The Bush Ranger," since his director and leading woman as well as the heavy, have all been selected.

Young Gloria, that charming young actress who pleased us so much formerly in the picturization of Gene Stratton-Porter's stories, is signed for the leading role. Miss Gloria, who has a child actress, and the company best adapted to handle each picture as an individual entity.

E. M. Asher is now making "The Sons of Araby" for First National, while Charles R. Rogers is making another of his Ken Maynard series.

Arthur Lubin is to have the heavy role in "The Bush Ranger." Lubin is under contract to go on the stage in New York for the fall, but in the meantime he is picking up his heavy pennies in pictures. His part in this one, it is said, is the best he has had since "Bardelys the Magnificent." He is best remembered for the stunts by his splendid performances in "Million" and "Desire Under the Elms."

"The Bush Ranger," as the title implies, is an Australian story.

Chet Whitley, a director who made several outstanding successes for D. W. Griffith and others, will serve here in a similar capacity.

Arthur Carew With UFA

Another of our good actors has forsaken Hollywood. He is Arthur Edmund Carew, who is en route to Europe to join UFA.

Well known as a screen and screen actor, whose latest screen role was that of a slave in "Uncle Tom's Cabin," Carew is to do to pictures what he did to the stage, one for UFA for a combined British and German company.

# Joshua Little

BY LEE SHIPPEY

VAUDEVILLIANS recently celebrated the one hundred anniversary of vaudeville, which shows they don't know much more about vaudeville than they do about other things.

Vaudeville was invented in the thirteenth century by Olivier Basquin, poet, singer and village clown of the little Norman town of Vaux.

It is probable that he invented and collected—most of the jokes now current in vaudeville, too.

Olivier's small-town comedy became so popular that other towns invited him, and the type of show became known as a Vaux. Finally it reached even to Paris, where it was cleaned up a bit and called Vaux-de-ville, or cittified Vaux-show.

Coming on the heels of the troubadours, who inclined to tragic stuff, Olivier's light entertainment scored so that any good history of French literature and drama will show that Vaux-de-ville was recognized as a distinctively new idea in public entertainment. But of course you couldn't expect vaudeville artists to know that.

They don't seem to agree, either, on pronunciation. Some call it woodville, some vawdville, some vawdyvil, and so on. But since the war we all know that tout de suite is pronounced foot-sweet, so we ought to know that Vaux-de-ville was pronounced vode-vil. Or vode-veil, if you must be real Frenchy.

Yea, Palomine, the inventor of vaudeville has been dead 500 years. So it wouldn't do you a bit of good to burn him in effigy now.

## With Dramatic Touches

The Palomine entered the restaurant and with great dignity announced to the man at the table next to ours: "Your car awaits without."

"Without what?" retorted the 12th.

"Without lights, and the cop."

"Without lights, and the cop,"

## THE GUMPS

GOSH! WHAT A PICTURE—LET REMBRANDT TAKE A PEAK IN THAT ROOM—AND WE CAN PAINT A MASTERPIECE THAT WILL LIVE TILL THE SANDS OF THE DESERT TURN INTO HAILSTONES—
